Tasks:

1. (**40 points**) Get the python script and dependencies from blackboard. Make a dll (pyd) file that we can import from python and that produces the output shown in comments. My hope is we'll get most of this done in class on 2/17/2020.
2. Python Embedding
   a. (**15 points**) Create a Singleton ScriptManager class.
   b. (**50 points**) run_script method
   c. (**5 points**) integrate our handle_error function
3. (**10 points**) Following the style guide (for new code you add to ssuge)
